“

*The opportunities that I got here in my formative years have been instrumental in building my career. The dedicated faculty and staff helped in the smooth completion of my course.*

*The environment here was conducive in the overall development of each student. Along with exceptional academics, the college also juggled a lot of co-curricular activities. My peers here have all gained immense success in their respective domains and are some of the most talented people I know. I thank the Alumni Association for connecting us all together.*

“

*When I joined MITM, I faced several challenges. The language barrier was a significant hurdle for me as I was not accustomed to the English medium of instruction. Additionally, my financial situation was not favorable, which meant that I had to work part-time to support myself while studying.*

*Despite these challenges, I remained committed to my goal of becoming an engineer. With the help of my professors, classmates, and mentors, I was able to overcome these obstacles and succeed in my studies. The education and training that I received at Medicaps has been invaluable in my career as an Engineer and helped me to achieve my dreams.*
